

SHEETPUNCH TYPE STIG STRÖM – for punching of test sheets

The sheetpunch is framed in a robust steel housing and is available in sizes between 100*100mm and 297*400. Depending on use, the punch can be delivered with following options:

- 3 cutting edges, for punching when one side is reference and 3 edges cut the sheet.
- 4 cutting edges for punching separate sheets.

Action is operated pneumatically with a foot pedal or a button according to customers preferences.

See enclosed reference list for customers currently using our sheet punches.
